15+ years	8 owned plant items	\$1.29M proven delivery	15 max direct workforce	3/3 on time or early
NQ civil experience	Self-performing — no sub chain	Reference projects completed	Direct hire — no FIFO crews	Reference project record

Business Overview

Redstone Civil Pty Ltd is an established civil earthworks and infrastructure contractor based in North Queensland. Operating for over a decade, we deliver bulk earthmoving, drainage installation, and road maintenance packages for local government, private developers, and Tier 1 head contractors across the region. We have a proven history of executing precision civil packages on time, directly supporting the growing pipeline of North Queensland infrastructure — including essential regional water and transport corridors.

With a direct-hire workforce of up to 15 personnel and our own fleet of heavy plant, we self-perform our works without reliance on subcontractors. This operating model gives us absolute control over project programming and safety — ensuring we can mobilise quickly, adapt to site variables, and provide Tier 1 head contractors with a reliable, responsive, and fully accountable civil partner.

Core Services

■ Bulk earthworks and site preparation (cut to fill)	■ Detailed excavation and batter shaping
■ Subgrade preparation and pavement construction	■ Stormwater drainage installation and open channel construction
■ Unsealed road re-sheeting and pavement maintenance	■ Rock ripping and heavy material handling
■ Table drain reconstruction and scour protection	■ Wet hire earthmoving plant solutions

Service Delivery Methodology

- **Self-managed fleet:** We operate and maintain our own plant, allowing rapid mobilisation without waiting on third-party dry hire availability.
- **Direct workforce:** We employ a direct crew rather than relying on subcontractors — our team is on the ground and productive from day one.
- **Local supply chain:** Established NQ materials and consumables suppliers ensure project continuity and minimise delays in the region.
- **Practical quality assurance:** Compactions, trim tolerances, and final levels meet strict NQ engineering specifications — 98% MDD for road pavements, accurate falls for gravity drainage.
- **Direct communication:** Daily pre-starts, direct phone contact with the business owner, and accurate progress reporting. If an issue arises, it is communicated immediately alongside a practical solution.

Plant & Equipment Register

All plant is owned and operated by Redstone Civil. Full service histories and plant risk assessments are maintained. All items are available for immediate mobilisation.

Equipment	Qty	Capacity / Size	Compliance Status
Komatsu PC120-10 Excavator	1	12 Tonne	Plant Risk Assessment · Full Service History
CAT 320 GC Excavator	1	20 Tonne	Plant Risk Assessment · GPS capabilities (confirm)
CAT 12M3 Grader	1	186 HP	UTS/GPS tracking (confirm)
CAT 262D3 Skid Steer	1	72 HP	ROPS/FOPS · Plant Risk Assessment
Dynapac CA2500D Roller	1	8.3 Tonne	Plant Risk Assessment · Flashing beacon
Kenworth T410 Tipper	1	22T GVM	UHF · PBS compliance (confirm)
Isuzu FRR 107-210 Tipper	1	14T GVM	UHF · Flashing beacon
Hino 700 Water Truck	1	10,000L	Dribble bar · Batter sprays · Cannon (confirm)

Items marked "(confirm)" have features requiring written verification prior to tender submission. Plant is available for client inspection by appointment.

Key Personnel

Mark RedstoneOwner / Operations Manager

Oversees all daily site operations, client communication, and plant management.

Qualifications	Cert III Civil Construction · Cert IV Business Administration
Licences	Excavator (to 100T) · Grader Ticket · Dogging Licence · White Card · HR Licence
Experience	15 years NQ civil construction · Founded Redstone Civil 2013

Site Supervisor / Leading HandTo be confirmed

On-ground crew management, daily pre-starts, and quality control.

Qualifications	Relevant heavy plant tickets · White Card · First Aid (to confirm)
Experience	10+ years civil construction experience (to confirm)

Senior Plant OperatorTo be confirmed

Precision final trim operations and bulk material handling.

Qualifications	Relevant heavy plant tickets / VOCs (to confirm)
Experience	5–10 years equipment operation (to confirm)

Licences & Registrations

✓ Cert III in Civil Construction	✓ Grader Ticket
✓ Cert IV in Business Administration	✓ Traffic Controller (TC) Licence
✓ General Construction Induction (White Card)	✓ Heavy Rigid (HR) Driver Licence
✓ High Risk Work Licence — Dogging	✓ CQMS Raize — Registered
✓ Excavator Ticket (up to 100T)	✓ Public Liability Insurance — \$20M (QBE, current to 30/06/2027)

Recommended additions in progress: QBCC Contractor Licence · ISO 45001/9001/14001 Certification (or aligned management system) · QLeave Registration · TMR Pre-qualification

Quality & Safety Management

Safety on Redstone Civil sites is driven by decades of trade experience and practical knowledge — our crews operate heavy machinery safely and understand site-specific hazards in North Queensland conditions.

We are actively formalising our WHS framework to fully align with Tier 1 and Queensland Government prequalification requirements. Current implementations include:

- Site-specific Safe Work Method Statements (SWMS) for all high-risk construction activities
- Documented daily pre-start plant checklists for all 8 plant items
- Formal Incident Management Plan and incident reporting register
- WHS Policy Statement aligned to ISO 45001 and ISO 45003:2021
- Psychosocial Risk Register — aligned to QLD WHS Amendment Regulation 2022

Project Experience

Bohle Plains Subdivision Stage 2 Earthworks
Cube Property Developments | 14 weeks · 2022

\$620,000
Completed 1 week early

Bulk earthworks for 47-lot residential subdivision — cut/fill 42,000m³, subgrade preparation, stormwater drainage installation, kerb subgrade.

Jensen Drainage Channel Earthworks
North Queensland Water Infrastructure Corp | 2024

\$390,000
Completed on time

Construct 1.8km open drain channel — bulk excavation 18,500m³, batter shaping, rock ripping, topsoil strip and respread. Subcontracted traffic management and survey.

Mount Louisa Road Pavement Maintenance
Townsville City Council | 2024

\$280,000
Completed on time

Re-sheet 4.2km of unsealed road — drainage table drain reconstruction, compaction to 98% MDD, line marking.
